EasTDVET

Easing Transfer of Digital project results to VET

Objectives

As learning organisations in VET, the project partners are addressing the top levels in their organisations to exchange transnationally about figuring out new, appropriate and successful pathways how to improve the structures and thus to increase the effectiveness of upskilling VET-staff when it comes to exploiting results from digital VET-projects which are dedicated to VET in general and particularly to the construction branch throughout Europe. This seeks to develop a joint Change Management.

Activities

There will be 3 phases and 4 transnational project meetings:

Monitoring cases & personal/individual profiles which foster/restrain digital transformation in form of SWOT analysis per partner for good and failed practices in order to derive mainstream SWOT.

Monitoring formal, legislative and other administrative aspects to foster/restrain digital transformation in form of SWOT analysis per partner for general conclusions how to deal with Change.

Drawing joint conclusions/perspectives for development in Change Management of VET-centres.

Meetings: Skopje (10-2023), Berlin (1-2024), Liege (4-2024), Vilnius (6-2024)

Results

Individual SWOT analyses partner by partner - shared work

Mainstream SWOT aggregated from individual SWOTs - shared work

Conclusions from this and development of a tool-box approach for a Change Management in involved VET-centres – shared work

BZB

Bildungszentren des
Baugewerbes e.V.

Approach for a development project to implement and use digital tools to better exploit existing and future digital project results
